PECANS

Whether planted in the yard, in a grove, or in a great orchard, Pecan trees are an asset to any home or estate. These valuable trees can be brought to production within a few years when they are fertilized and well cultivated. When set in an orchard, money-making crops can easily be grown between rows until the trees begin to produce and pay good dividends, after which the grower should continue to plant cover crops to retain and increase the fertility of the soil. Our Pecans have exceptionally well-developed root systems, will live well, and grow rapidly. Grafted Paper-Shell Varieties: Burkett, Delmas, Giant Special, John Garner, Moneymaker, Moore, San Saba, Schley, Squirrel's Delight, Stuart, Success. 2 ft., \$1.58; 3 ft., \$1.98.

TEXAS PECANS. Very hardy. 2 ft., \$1.38; 3 ft., \$1.50.

Planting these trees will greatly increase your property value. **DO IT NOW!**

Floribundas...

Make your garden the showplace of your neighborhood with Talisman's favorite Floribunda Roses. Floribunda means "abundant blooming." Their colors are gay all season and the bushes are covered with the daintiest blooms. They are hardy, grow where any Roses will, and are as colorful as azaleas; especially good for hedges, borders, at the base of tall plants, along low walls—in fact, in any place for masses of color. Notice our selection of varieties: Betty Prior, Donald Prior, Goldilocks, and Permanent Wave. No better varieties have ever been grown. There is also our Climbing Summer Snow, which is as good as they ever come. We have it in bush form, too, if you want it. Make your selection and glorify your garden with these wonderfully rich colors.

Greetings From Talisman Nurseries
